Roles and Responsibility

- Detecting and troubleshooting hardware and Software
- Installation, Configuration and troubleshooting of OS like Windows XP/7/8/10
- Device Driver Installation and configuration
- Responsible for user data backup and restoration
- L1 level Network, server and virtual machines related issues

Projects

KEYSIGHT TECHNOLOGIES:

Keysight Technologies Inc, or Keysight, is a US based company that manufactures test and measurement equipment, software and deliver to the big companies of the world. it's a big client of the ITC INFOTECH.

Keysight required to replace its existing Asset Management application Infoline to address limitations such as ease of search and increase visibility to asset utilization data with the addition of IoT solution. The new solution is expected to drive three key areas, Asset Tracking, Asset Utilization & Asset Lifecycle Planning.

Currently, keysight is about to finish it's version 1 and version 2 for the same is getting launch on the Feb 2019

KeyRole: I'm working as a *Front-end* Engineer & *IoT UI* Engineer for the project and on backend API's (on demand). Currently, i'm developing screens for certain modules as per the requirement for version 2.

Below are the technologies I use:
- HTML5, CSS3, JS, REACT, MOBX, ANTD, AG GRID, THINGWORX.

STERIS:

STERIS is a leading provider of infection prevention and other procedural products and services. Our Company was pitching to change the current architecture of the IoT Solution with the more efficient technologies. The Final solution got selected in the meeting. We were two person working on the demo.

KeyRole: I was working as a front-end Engineer for the project.

Below are the technologies I used:

- METEOR REACT, ANTD, MONGODB, EMQTT

J&k Bank (Personal Project):

j&k bank is the one of the leading banks in j&k . They doesn't have a good interfaced UI to get the 16-digit number and bank details .

i have made a React Application for it which is not yet published but you can check the code on github .

Below are the technologies I used:

- REACT and ANTD

Education

BE Computer Science - 2015 | Kashmir University

A+, N+, CCNA, SERVER - 2015-2016 | Rooman Technologies

Networking - 2013 | BSNL India

Interests

Development, Design, Art, AI, Cryptocurrency, Entrepreneurship, Gadgets, Cooking, Traveling, Reading,Networking and Writing.
